

# SuPr-N

## Multikraft Probiotic Solutions is a world leader in multi-strain microbial technology, with over 25 years of experience.

Our proprietary SuPr-N product is an environmentally safe Nitrogen source, containing trace minerals fermented with microbes, as well as humic and fulvic acids.

Nitrogen contained within SuPr-N is split between a number of pools including microbial biomass, soluble (protein peptides and amino acids), ammonium and nitrates made available as required by the crop. SuPr-N effectively acts as a controlled release fertiliser as the nitrogen is mineralised over time.

SuPr-N significantly increases soil microbial biomass compared to controls and other treatments.

### Key benefits:

- ✓ 17% stabilised nitrogen, available immediately as well as 1% potassium.
- ✓ Includes macro, microorganisms and trace elements.
- ✓ Naturally promotes germination, root development and plant growth.
- ✓ Balanced nitrogen for soil, foliar and compost applications.
- ✓ Enhanced with beneficial microbes.
